Did the activity deliver on the aim identified in the request?	Yes
If yes, how was success measured?	The overall score given by the participants to this activity was 8.3 out of 10, and the sessions were evaluated between 4 and 4.6 out of 5, with the majority of the participants who responded to the evaluation assigning a score of 9.
If not, why not?	Because the activity was delivered remotely, it was hard to generate the same levels of interaction as seen in pact activities on the same subject. But overall, this did not prevent the activity from achieving its aim.
Number of Participants:	157 participants were registered to participate. Numbers connecting to the session exceeded this on occasion.
Of whom, how many women?	67
